

Viacom is being ridiculous. The airways are not owned by them they are being allowed to use them. They belong to the Aamerican people. Should Viacom or anyone else feel they do not want anyone to have the ability to record their broadcast then clearly they should not broadcast the material. If they are not broadcasting and are taking up bandwidth they should lose their license and another should be granted the space. I am quite certain their would be no shartage of users willing to take their bandwidth.
